DHARA **PATEL**

630-306-5478 | 1991dharapatel@gmail.com | GitHub: dpatel0114 |Portfolio | LinkedIn: dharapatel91

Full stack web developer with a passion for creating robust designs. Seeing others enjoying their work in tech, I was drawn in by their satisfaction. This led me to do some research, take some classes & make the change for myself. While in biochemistry, I lacked the daily challenge & creativity that I get from coding. With customer experience, my ability to communicate an idea cleary has allowed me to be successful in many environments. What I want most is to create clean, concise code that changes the outlook of others while delivering the intended vision.

TECHNICAL SKILLS

API, AWS, Git, HTML/CSS, JavaScript, JSON, Node, Postgres, Postman, Rails, React, Redux, Ruby, SQL, TravisCI with experience in Research & Wireframing

TECHNICAL PROJECTS

Investiversity – Github | App
Test investment strategy to buy & sell stocks using virtual money
- Implemented backend using Ruby for handling requests
- Uses postgres database to store user profile, stocks information & stocks transactions
- Uses authentication for secure login & http requests
- Created fronted using React & used Redux for the state management
